

WEEK 12 | UNDERSTANDING DIGITAL GENDER-BASED VIOLENCE 理解數位時代的性別暴力

ALINGGO, SHIUE LING, LEE

慈濟大學人類發展與心理學系教授

Learning Goals

01. Reflect on our digital development and online habits.
反思我們的數位化發展和網路習慣
02. Analyze how online interaction can escalate into digital gender-based violence.
分析網路互動如何演變為性別為基礎的網路暴力
03. Examine media representations of contemporary adolescent cases.
檢視媒體對當代青少年案例的報導
04. Evaluate the current situation of digital gender-based violence prevention, including the role of algorithms and digital platforms.
評估目前基於性別的網路暴力預防現狀，包括演算法和數位平台的角色

Target Vocabulary of the Day

- amplification 放大效應
- algorithm 演算法
- engagement 參與度
- structural inequality 結構性不平等
- disproportionate 不成比例的
- accountability 問責制

You will need these words in today's discussions and final activity.

Activity 1 — Digital Timeline Icebreaker

Step 1 — Individual Reflection

1. At what age did you first start using the internet regularly?
2. How did your parents respond?
 - Supportive? 支持 ?
 - Concerned? 擔憂 ?
 - Restrictive? 限制 ?
 - Neutral? 中立 ?
3. How does your school use digital tools 數位工具?
4. What is one online experience you are proud of?
5. What is one online experience that confused or frustrated 沮喪 you?

Activity 1 — Digital Timeline Icebreaker

Step 3 — Whole-Class Quick Poll

- How many of you started before age 10?
- Before age 13?
- After junior high?

Activity 1 — Digital Timeline Icebreaker

Step 3 — Whole-Class Quick Poll

- Did parental control change over time?
- Did school digital use increase during COVID?
- Are we digital natives — or digital learners?

Activity 1 — Digital Timeline Icebreaker

**If we all have different digital histories,
how might this affect how we understand digital gender-based
violence?**

Activity 2 — Media Reflection on Adolescent Digital Gender-Based Violence

Step 1 — Guided Viewing

While watching, please focus on the following three questions:

1. What triggered the situation?
2. At what moment did the situation become harmful?
3. How does the media describe the victims and the perpetrator?

Activity 2 — Media Reflection on Adolescent Digital Gender-Based Violence

Step 2 — Case Context: The Mickey Huang Incident

This case began in June 2023, when Mickey Huang黃子佼 was publicly accused公開指控 of sexual harassment性騷擾 and involvement in the possession of intimate images of minors持有未成年人私密影像.

He later admitted misconduct and attempted self-harm.

Subsequent檢察官 investigation調查 by prosecutors revealed that he had purchased hundreds of illegal videos from an underground online pornography色情論壇 forum known as “Creative Private Room.”「創意私房」

Many of the videos involved minors未成年.

Activity 2 — Media Reflection on Adolescent Digital Gender-Based Violence

Step 2 — Case Context: The Mickey Huang Incident

The case triggered引發 intense public discussion and condemnation譴責 regarding:

- child sexual exploitation兒童性剝削
- digital sexual violence網路性暴力
- the hidden industry chain of illegal image distribution非法影像傳播的隱密產業鏈

This case is not only about one individual.

It raises broader concerns about digital consumption消費, platform regulation平台監管, and systemic exploitation.

Activity 2 — Media Reflection on Adolescent Digital Gender-Based Violence

Step 3 — Group Discussion

Choose one case (from the news clips shown) and discuss it in your group.

Use the following guiding questions, but you may also raise your own.

Activity 2 — Media Reflection on Adolescent Digital Gender-Based Violence

Step 3 — Group Discussion

A. Escalation事件升級

- How did the case move from private behavior私人行為 to public crisis公共危機?
- What role did digital circulation數位傳播, reposting, or online communities play?
- Did algorithmic演算法 amplification放大效應 increase visibility曝光度 or harm?

Activity 2 — Media Reflection on Adolescent Digital Gender-Based Violence

Step 3 — Group Discussion

B. Media Framing 媒體框架

- Does the report focus more on the perpetrator's 施害者 actions or the victims' experiences?
- Is there any subtle 隱晦 victim-blaming 受害者指責?
- How does the language reflect gender norms?
- Are the victims portrayed with dignity 尊嚴 and protection?

Activity 2 — Media Reflection on Adolescent Digital Gender-Based Violence

Step 3 — Group Discussion

C. Structural Questions

- Is the case presented as an individual moral failure or a systemic issue?
- Are institutions機構 mentioned (schools, platforms, law enforcement)?
- What structural conditions allowed this behavior to continue?
- Which identities might increase vulnerability脆弱性 in this case (e.g., gender, age, sexuality, ethnicity, class)?
- Would this case look different if the identities changed?
- Was the legal framework法律架構 mentioned in the report?
- Did the media explain legal protection, or only focus on scandal醜聞?

Analytical Shift

Why was this possible?為什麼會發生這種情況？

What systems made this easier?哪些制度使這種情況更容易發生？

Who benefits from silence?誰從沉默中獲益？

Who lacks protection?誰缺乏保護

Deep Learning Activity

From Algorithm to Amplified Inequality

Step 1 – Mini Teacher Summary

Example 1

A screenshot is posted in a small group chat

→ shared to a larger group

→ reposted publicly

→ boosted by the algorithm 由演算法推廣

Example 2

A controversial 具爭議的 comment receives many angry reactions

→ the algorithm detects high engagement 互動度

→ the content is shown to more users

Deep Learning Activity

From Algorithm to Amplified Inequality

Step 1 — Mini Teacher Summary

Example 3

A case involving a marginalized identity 邊緣化群體

→ attracts attention 引起關注

→ becomes widely discussed 被廣泛討論

→ receives disproportionate judgment 受到不成比例的評判

Today, you will unpack how this system works.

Deep Learning Activity

From Algorithm to Amplified Inequality

Step 2 — Student Concept Construction

- Algorithm演算法
- Amplification放大效應
- Engagement Economy參與式經濟
- Digital Circulation數位流通
- Amplified Inequality加劇不平等

Each group will choose one or two concepts.

Your task is to define the concept clearly and explain how it connects to digital gender-based violence.

Deep Learning Activity

From Algorithm to Amplified Inequality

Step 2 – Student Concept Construction

Each group must prepare:

A. A Clear Definition

Use your own words (2–3 sentences).

B. One Real Example

You may use:

- News cases新聞案例
- Social media trends社群媒體趨勢
- School-related situations學校相關情境
- Hypothetical examples假設性案例

Deep Learning Activity

From Algorithm to Amplified Inequality

Step 2 – Student Concept Construction

C. One Connecting Statement

For example:

This concept helps explain why digital harm spreads quickly.

This concept shows how inequality becomes visible online.

Rules:

- You may use the internet to research.
- During your presentation, no phones are allowed.
- You must explain from understanding, not read from your screen.

Deep Learning Activity

From Algorithm to Amplified Inequality

Step 3 — Whiteboard / Padlet Construction

Each group writes on the board:

- Concept title
- Definition
- Example
- Connection to digital gender-based violence

Step 4 — Group Presentation

Unit 3 — Text Reading & Prevention Reflection

1. What level of prevention預防 is emphasized?(Individual behavior個人行為? School education? Law? Platforms平台?)
2. What seems to be missing?
3. Does the text address structural inequality結構性不平等 or only personal responsibility?

Unit 3 — Text Reading & Prevention Reflection

Key Point 1 — Individual-Level Prevention

1. “Do not send private images”
 2. “Protect your privacy”
 3. “Be careful online”
- Useful but limited.

Unit 3 — Text Reading & Prevention Reflection

Key Point 2 — Institutional-Level Prevention

- School policy 學校政策
 - Reporting system 檢舉系統
 - Legal protection 法律保護
- Important but reactive 被動.

Unit 3 — Text Reading & Prevention Reflection

Small Group Reading & Discussion

A. Prevention Level預防層面

- Which level is most emphasized in the text?
- Which level receives the least attention?

B. Effectiveness有效性

- What prevention strategies seem realistic?
- What strategies may be too idealistic理想化?

C. Critical Reflection批判性反思

- Does the text shift推卸 responsibility to individuals?
- Does it address涉及 digital systems?
- Does it consider intersectional vulnerability交叉性脆弱性?

Final ESP Language Game

— “Prevention Challenge”

每組抽一張任務卡

Card A

Argue^{論證} that current prevention focuses too much on individuals.

Card B

Defend^{捍衛} school-based prevention.

Card C

Argue that platforms must take more responsibility.

Card D

Explain how algorithmic amplification^{演算法放大效應} changes prevention strategy.

Final ESP Language Game — “Prevention Challenge”

Rules

每組有 5 分鐘準備

必須使用：

- 至少 3 個 target vocabulary words
- 至少 1 個 causal sentence
- 至少 1 個 evaluative sentence

每組 1–2 分鐘發言。

其他組可提 1 個挑戰問題。

Lesson Closure

Digital gender-based violence is not only a personal issue.
It is shaped by systems, policies, and technology.
Prevention must move from reaction to transformation.

Week 12

UNDERSTANDING DIGITAL GENDER- BASED VIOLENCE FROM ONLINE INTERACTION TO ALGORITHMIC AMPLIFICATION

TCU, ALINGGO SHIUE-LING, LEE @2025
